

COMPANY PROFILE

ABOUT US

PLAS PACK INDUSTRY COMPANY LIMITED has been providing satisfied customers with custom thermoforming since 1987 by Mr. Virat Woontranon. The company is located in the outer area of Bangkok, Thailand allowing us to be able to ship our products nationwide with ease. Majority of our products began from Polystyrene (PS) including plastic sheets, printed ice cream cup and tray which are virgin, food graded and fully recyclable. The company has been working hard to ensure safety and customer satisfaction as they have always been our top priorities. All of our machines are imported from reputable suppliers around the globe including The United States, Germany, Netherlands and Taiwan. The company has slowly become one of the most respected mass thermoforming companies in Thailand.

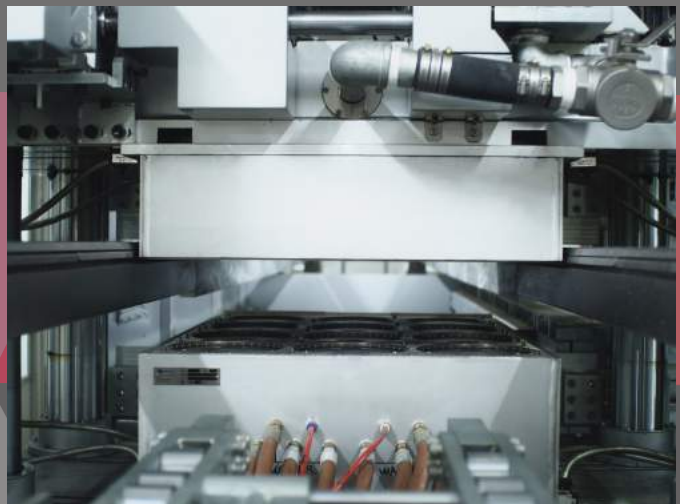

With more than 30 years of thermoforming experience. Plaspac has continuously expanding our facilities and capabilities to ensure sustainable growth and customer satisfaction. The company is now offering various types of materials such as Polypropylene (PP) and Polyethylene terephthalate (PET) and is doing our best to improve our facilities to provide an eco-friendly compostable plastic, Polylactic Acid (PLA) in order to preserve our environment for future generations. We operate two shifts a day, 24/6 for maximum utilization of machinery and consistency in the process which allows us to produce **more than thousand million pieces annually** to ensure the customers' need and meet the demanding quality standards of our OEM customers and suits every purpose of uses.

OUR MET CHALLENGES

- Large volume and fast production capability, leads to economy of scales to help the customer control their cost.
- Consistent quality results from the best machines and materials choices.
- Large inventory storage capabilities to allow customers to maximize their JIT Goals.
- Automated production line to improve product quality, accuracy, repeatability and less human error.
